

- This shape has more than one right angle.
- This shape has four sides.
- This shape has two sets of parallel lines.
- All the sides on this shape are equal.

square

- This shape has more than one right angle.
- This shape has parallel lines.
- This shape has six sides.

irregular hexagon

- This shape has four sides.
- This shape has two sets of parallel lines.
- This shape has two acute angles and two obtuse angles.

rhombus

- This shape has more than one right angle.
- This shape has four sides.
- This shape has two sets of parallel lines.
- The sides on this shape aren't all equal.

oblong

- This shape has five sides.
- This shape has at least one right angle.
- This shape has a reflex angle in it.

irregular pentagon

- This shape has three sides.
- This shape has no right angles.
- This shape has two equal angles.

isosceles triangle

- This shape has five angles.
- None of the angles are right angles.
- All the sides on this shape are equal.

regular pentagon

- This shape has four angles.
- This shape has two acute angles and two obtuse angles.
- This shape has one set of parallel lines.

trapezoid

- This shape has six angles.
- None of the angles in this shape are right angles.
- All the sides on this shape are equal.

regular hexagon

- This shape has a right angle.
- This shape has two acute angles.
- This shape has three sides.

right-angled triangle

- This shape has five sides.
- This shape has unequal angles.
- This shape has one set of parallel lines.

irregular pentagon

- This shape has no right angles.
- This shape has equal sides and angles.
- This shape has three sides.

equilateral triangle
