

I laid 4 eggs in the morning and the same amount of eggs in the evening. How many eggs did I lay altogether?

Learning Objective: To be able to solve doubling word problems.

Here are some number sentences. Circle the ones that are doubles.

$4 + 4 = 8$

$2 + 2 = 4$

$5 + 7 = 12$

$1 + 3 = 4$

$3 + 3 = 6$

$1 + 1 = 2$

How do you know they are doubles?

Can you fill in the missing numbers?

Double 4 is \_\_\_\_\_

Double \_\_\_\_ is 10

Double \_\_\_\_ is 6

Double 1 is \_\_\_\_\_

Double 2 is \_\_\_\_\_

### Word Problems

A T-Rex has 2 legs. A Stegosaurus has double that amount. How many legs does a Stegosaurus have?

Phil the Pterodactyl has 5 eggs. Peter the Pterodactyl has double the amount of eggs.  
How many eggs does Peter have?
